

# THE Lexington Intelligencer

A. W. ALLEN, Editor and Publisher.

Issued weekly on Fridays. Subscription \$1.50 per year, payable strictly in advance.

Entered as second-class mail matter at the Postoffice in Lexington, Missouri.

All communications to go into print in THE INTELLIGENCER must be signed.

## POLITICAL ANNOUNCEMENTS

We are authorized to announce C. L. KENNEY as a candidate for the office of Assessor of Lafayette County, subject to the action of the Democratic voters at the Primary Election to be held August 3, 1920.

We are authorized to announce J. B. HEREFORD of Odessa, as a candidate for the office of State Senator from the Seventeenth District, subject to the action of the Democratic voters at the Primary Election to be held August 3, 1920.

We are authorized to announce LESLIE MITCHELL as a candidate for the office of Sheriff of Lafayette County, subject to the action of the Democrat voters at the Primary Election to be held August 3, 1920.

We are authorized to announce W. D. MENG as a candidate for the office of Treasurer of Lafayette County, subject to the action of the Democrat voters at the Primary Election to be held August 3, 1920.

We are authorized to announce J. C. SHELTON as a candidate for the office of Treasurer of Lafayette County, subject to the action of the Democrat voters at the Primary Election to be held August 3, 1920.

Old Bill Bryan WAS a merry old soul.

A "Roosevelt" being on the Democrat ticket, of course, settles the question of the negro vote.

The same element which classified Senator Harding as a "nonentity," has now classified Governor Cox as a "wet." Take your choice.

The Daily Advertiser says that the nomination of Franklin D. Roosevelt "is a great disappointment." Strange, Sam should take it so hard.

It is said that Governor Cox began life as a printer's devil at \$8 per week. That shows that he was an exceptional boy, as few "devils" draw that large a salary.

As a lightning change artist the Kansas City Star has no equal. It switches from "Anti-Boss" to "Pro-Boss" in the flash of the eye, and in so doing makes easy sailing for the Democrat candidates at the November election.

Dr. B. T. Payne and E. B. Campbell left Sunday evening for Chicago to attend the annual convention of the Grand Lodge of Elks.

## Loss of Appetite.

As a general rule there is nothing serious about a loss of appetite, and if you skip a meal or only eat two meals a day for a few days you will soon have a relish for your meals when meal time comes. Bear in mind that at least five hours should always elapse between meals so as to give the food ample time to digest and the stomach a period of rest before a second meal is taken. Then if you eat no more than you crave and take a reasonable amount of outdoor exercise every day you will not need to worry about your appetite. When the loss of appetite is caused by constipation as is often the case, that should be corrected at once. A dose of Chamberlain's Tablets will do it.

Mrs. M. D. Wilson returned Saturday evening from a few weeks' visit in St. Louis.

Mr. and Mrs. Frank Hale of Kansas City, spent Sunday and Monday here with relatives.

## Summer Complaints in Children

There is not anything like so many deaths from this disease now as before Chamberlain's Colic and Diarrhoea Remedy came into such general use. When this remedy is given with castor oil as directed and proper care is taken as to diet, it is safe to say that fully ninety-nine out of every hundred cases recover. Mr. W. G. Campbell of Butler, Tenn., says, "I have used Chamberlain's Colic and Diarrhoea Remedy for summer complaint in children. It is far ahead of anything I have ever used for this purpose."

Corder Steele of Kansas City, spent Sunday and Monday here with his mother, Mrs. Nannie C. Steele.

Mr. and Mrs. Jay Richardson of Kansas City, spent Sunday and Monday in Lexington with relatives.

## Summer Complaint Quickly Relieved.

"About two years ago when suffering from a severe attack of summer complaint, I took Chamberlain's Colic and Diarrhoea Remedy and it relieved me almost instantly," writes Mrs. Henry Jewett, Clark Mills, N. Y. This is an excellent remedy for colic and diarrhoea and should be kept at hand by every family.

Mr. and Mrs. F. M. Hord announce the birth of a son, Wednesday, July 7, 1921.

Dr. and Mrs. C. T. Ryland returned yesterday morning from a month's outing at Lake Kegonsa, Wis.

Albert Gillen has returned from attending the convention of the Winchester Arms dealers at New Haven, Conn.

## BEE RAISERS MAKE MONEY

Possible to Beat the High Cost of Sugar and So Unite Pleasure With Gain.

Keep a bee and produce your own sweetening, says Thrift. Sugar is scarce, its price high, and you cannot grow it in your garden. But honey contains several kinds of sugars, as well as some other substances, and a colony or two of bees in orchard, garden or back yard will afford both pleasure and profit, as many thousands of people know, and at the same time will provide a wholesome food which will take the place of a large part of the sugar now consumed.

Not only is the bee valuable as a producer, but it offers a recreation which pays its own way, and is most beneficial in cross-pollinating the flowers of various economic plants.

Honey as it comes from the hive is in the form of comb honey, and as such appeals to most users. But enormous quantities of honey are now used for manufacturing purposes, and this demand is, of course, for the other form in which it is on the market—extracted honey.

This honey is usually pure and of good quality, and the advantage of comb honey, which retails at slightly higher price, is chiefly its attractiveness to the eye. The simplest way of using extracted honey is to serve it like a sirup.

## AFFINITY

"Did you see where they turned the German royal stables into a library?"

"That's not altogether unfitting. Isn't it the stables which cause men to make books?"

## DETERMINING STAR COLOR.

A new means of determining star colors, devised by Dr. E. S. King, is described in the Journal of the British Astronomical Association. Over the telescopic objective is placed a piece of plate glass (commercial glass is good enough for the purpose), which is coated with a gelatin film, one-half of which is stained yellow and the other half blue. The images of the stars are then photographed out of focus on isochromatic plates. Each image, therefore, appears as a disk, one portion of which shows the effect of the yellow light and the other the effect of the blue light. The two halves of the image are then compared by means of a photographic wedge or by some other similar means.

## DEMAND FOR DIAMONDS.

Considerable activity has prevailed in the diamond trade in British Guiana within the last few months, and prices have advanced to a high level heretofore unknown, states Consul McCunn in his formal report. Expeditions are being dispatched to the diamond fields in the interior by those interested in the business in Georgetown. It is currently reported that the English market is eager to absorb any quantity of stones, large or small, and that they are being bought not only for English but also for American markets regardless of present exceptionally high prices.

## APPETITE FINDER.

Two-year-old Albert was ill, and his grandmother at English was explaining to a caller that he had lost his appetite. Shortly afterward his mother on going to his bedside in answer to his call, asked him what he wished. He replied: "Appetite lost, mother. Find appetite."

## TO PROTECT THE GARDENER.

As an enthusiastic amateur gardener we favor an ordinance requiring the muzzling of chickens and requiring dogs to wear boxing gloves on their paws during the gardening season.—Arkansas Gazette.

## Buttermilk—A Good Drink For The Summer.

The term buttermilk has for many years been applied to the product left after churning milk or cream and abstracting the butter. In the last few years a new kind of buttermilk has been placed on the market which is rapidly displacing the old-fashioned, home-churned product. Some prejudice exists against these manufactured buttermilks, but as an actual matter of fact they are cleaner and better suited for food purposes than the old product was under ordinary conditions. The new buttermilk has a sharper and cleaner taste, largely due to the fact that the acid is developed more rapidly, and from known germs.

Butter manufacturers do not depend on the accidental souring of milk as much as formerly, but use "pure culture starters," as they are called. So in manufacturing the buttermilk we add known germ to clean, skimmed milk, and produce an artificial buttermilk which is extremely pleasing to the taste of most people, and is freer from dirt and adventitious germs than the old product was.

Slightly different methods exist, but the following recipe represents the newer product, and will show people what they are drinking when they take the manufactured buttermilk:

One gallon of whole milk is added to twenty gallons of skimmed milk as soon as it has been separated. This is not necessary, but is done because most people like to see some signs of butterfat. "Starter" is added, and the whole quantity of milk is kept at 70° F for six or seven hours. It will be found to have curdled. It is then churned for one-half hour, and should be bottled at once and cooled to 50° or below to prevent the further development of acid and separation of whey. It is finally strained through cheesecloth to remove any coars lumps and to give a smooth product.

It is a refreshing and tasteful drink with high food value, and as a summer drink it is especially grateful as well as useful to both children and to adults.

## Chamberlain's Colic and Diarrhoea Remedy.

This medicine always wins the good opinion if not the praise of those who use it. Try it when you have need of such a remedy.

W. W. McCall left Wednesday for Butler, Mo., on business.

Hugo Nord left Wednesday evening for Brush, Colo., where he has accepted a position in a newspaper office.

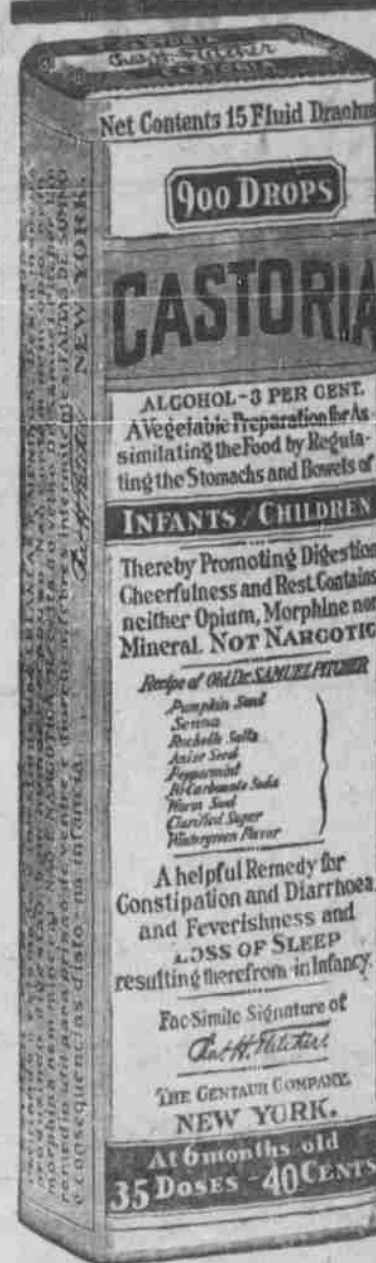

## DULL AND SHARP SHOOTING PAINS

Michigan Lady Suffered Such Pains In Back and Head, But Says Cardui Stopped These Bad Spells.

Palm Springs, Mich.—Mrs. Chas. T. Fuller, of this place, writes: "In 1911 I got run-down, and I suffered great pain...with both dull and sharp shooting pains...also back and head. I was weak and could only drag around, and should have been in bed, for I really wasn't able to be up. At times I would have spells that would be so bad I'd have to go to bed, and suffered intensely."

I decided to try Cardui, and saw a great improvement in less than a month's time. I used 7 or 8 bottles and was stronger. I got so much better that my strength returned and my work was easy for me. Cardui did me a world of good. It built me up in health and strength. I haven't had one of those bad spells since. I haven't had to take any more medicine since or have any doctors either and have been able to do my work right along...I recommend it to other women highly as the best medicine I know of for women who suffer from female trouble."

If you suffer from female troubles, follow this advice. Get a bottle of Cardui today and give it a thorough trial. It should help you, as it has helped thousands of other women in the past 40 years. At all druggists.
